PROFESSIONAL SUMMARY

Dynamic and results-driven Senior Software Engineer with over 6 years of experience designing, building, and deploying robust cloud-based applications. Adept at leading cross-functional teams, optimizing backend system architecture, and implementing scalable microservices. Passionate about modern DevOps workflows, continuous integration, and engineering top-tier user experiences.

TECHNICAL SKILLS

Languages: Python, JavaScript (TypeScript), Go, Java, SQL, HTML5/CSS3

Frameworks & Libs: Django, FastAPI, React, Node.js, Next.js, Spring Boot

Cloud & DevOps: AWS (S3, EC2, Lambda, RDS), Docker, Kubernetes, GitHub Actions, Terraform

Databases & Tools: PostgreSQL, MongoDB, Redis, Git, GraphQL, Linux systems

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Mar 2024 – Present

Vertex Tech Solutions — San Francisco, CA

- Architected and migrated a monolithic billing application into high-performance Go microservices, reducing transaction processing latency by 42%.
- Led an agile team of 6 engineers to deliver an internal data-streaming dashboard utilized by management to track live business metrics.
- Spearheaded the implementation of automated CI/CD infrastructure leveraging GitHub Actions, decreasing deployment failure rates by 25%.

Software Engineer II

Jul 2021 – Feb 2024

Nova Cloud Analytics — Austin, TX

- Designed and managed relational database schemas within PostgreSQL, writing complex queries and optimizing indexes to improve report generation speed by 50%.
- Developed interactive, dynamic UI features using React and TypeScript, heavily boosting user retention metrics over a 12-month timeline.
- Collaborated seamlessly with product managers and UX designers to conceptualize, mock, and execute 15+ comprehensive functional software updates.

KEY PROJECTS

Distributed Task Scheduler (Open Source)

Python, Redis, Docker

- Created a highly available, asynchronous task distribution system capable of processing up to 10,000 parallel jobs per minute.
- Utilized Redis for real-time message queuing and implemented automated worker fault-tolerance to eliminate single points of failure.

E-Commerce Microservices Infrastructure

Next.js, FastAPI, PostgreSQL

- Engineered a full-stack, responsive web storefront integrating secure third-party payment gateways and real-time inventory adjustments.
- Deployed containerized environments via Docker to achieve seamless local orchestration and rapid production alignment.

EDUCATION

B.S. in Computer Science

Graduated May 2021

State University of Technology

- Graduated Summa Cum Laude (GPA: 3.92/4.0)
- Academic Focus: Distributed Systems, Advanced Algorithms, and Software Engineering Principles.
